

Milk Production on a Dairy Farm

Questions

1. Identify the event that prompts the start of milk production in a dairy cow.

Explain the relationship between the event and milk production.

2. Define “lactation cycle.”

3. The author points out that milk production on a dairy farm is nonstop. What evidence is given to support that claim?

4. How does the quality of the feed impact milk production?

5. Draw a diagram that summarizes how the cycle of milk production on a dairy farm works. There should be at least 3 parts in your diagram.
