#### Questions

1. The organizational structure of this passage is set up to support the purpose of the passage. What is the purpose of the passage? (check all that apply)
   - identify cause and effect
   - identify similarities and differences **✓**
   - explain chronology
   - make comparisons **✓**
   - explain problem and solution
   - provide information **✓**

   **Skill**
   - **Comparison**

   **Common Core Standards – Grade 4**
   - RI.4.5 Describe the overall structure (e.g., chronology, comparison, cause/effect, problem/solution) of events, ideas, concepts, or information in a text or part of a text.

2. Explain the purpose of the digestive system.
   - It is the digestive system that breaks down food so it can be used by the body.
   - What role does chewing and swallowing play in the digestive system?
   - Chewing helps break up the food into small pieces. Swallowing sends the food to the stomach where more digestion occurs.

   **Skill**
   - **Reasons and Evidence**

   **Common Core Standards – Grade 4**
   - RI.4.8 Explain how an author uses reasons and evidence to support particular points in a text.

3. Identify and explain the significant difference between the digestive system of a cow and the digestive system of a human.
   - A cow has a stomach with 4 compartments. A human stomach has no compartments. Cows chew and swallow their food twice. Humans swallow and chew their food once

   **Skill**
   - **Health Concepts**

   **Common Core Standards – Grade 4**
   - RI.4.3 Explain events, procedures, ideas, or concepts in a historical, scientific, or technical text, including what happened and why, based on specific information in the text.

4. What explanation is given for why a cow chews and swallows its food twice? When they eat, cows do not chew up the food very well before swallowing it. Later they will cough it up in small amounts called cud to chew better and swallow a second time. Cows don’t have top teeth to help them bite and tear food so they can’t break it up very well when they eat it. The extra chewing and swallowing helps them break up the food so it is more easily digested.

5. Refer to the diagrams of the cow’s digestive system and the human’s digestive system when answering. What similarities are shown in the diagrams? Both systems have the same order of parts: mouth → esophagus → stomach → small intestines → large intestines. What differences are shown in the diagrams? The structure of some parts is different. There are differences in the way they look.

RI.4.3 Explain events, procedures, ideas, or concepts in a historical, scientific, or technical text, including what happened and why, based on specific information in the text.

RI.4.7 Interpret information presented visually, orally, or quantitatively (e.g., in charts, graphs, diagrams, time lines, animations, or interactive elements on Web pages) and explain how the information contributes to an understanding of the text in which it appears.
